Extreme gas behavior (especially near state boundaries) can introduce additional flow uncertainties. 2 Achievable steady state control may be limited by user-configurable PID tuning and process conditions. Dynamic control performance is also limited by control response time, which may vary with the flow rate.

250 SLPM full scale through 1000 SLPM full scale

Standard specifications. Consult Alicat for available options.

FEATURES						
STP Reference Conditions 25°C and 1 atm (default), user configurable						
NTP Reference Conditions	0°C and 1 atm (default), user configurable					
Monochrome LCD or Color TFT Display with integrated touchpad	Simultaneously displays mass flow, volumetric flow, temperature, and pressure					
Gas Select™	98 user selectable gases stored internally. Each gas optimized to match NIST's REFPROP 10 gas property calculations across the operating temperature and pressure ranges for highest accuracy.					
COMPOSER™	20 user definable gas mixes. Each mix may have up to 5 gases with 0.01% precision.
